Publications

**Books and Monographs**

**Articles in Books and Journals**

34. C. Schaal, M. Krautter, M. Hanss: Dispersion in cylindrical waveguides with uncertain parameters. Alber, H.-D., Kraynyukova, N. and Tropea, C. (eds.):

Papers in Conference Proceedings

110. M. Hanss, S. Turrin: ”The future is fuzzy” – An approach to comprehensive
modeling and analysis of systems with epistemic uncertainties. *Proc. of the
Leuven Symposium on Applied Mechanics in Engineering – LSAME.08*, Leuven,
Belgium, 2008.

111. F. Fleissner, M. Hanss, T. Haag, P. Eberhard: Analysis of granular chute flow
based on a particle model including uncertainties. *Proceedings of the 1st Inter-
national Conference on Computational Contact Mechanics (ECCOMAS) 52(2):
Lecce, Italy, 2009.*

112. T. Haag, P. Reuß, S. Turrin, M. Hanss: An inverse model updating procedure for
systems with epistemic uncertainties. *Proc. of the 2nd International Conference
on Uncertainty in Structural Dynamics – USD 2009*, pp. 116–125, Sheffield, UK,
2009.

113. M. Hanss, S. Turrin: A fuzzy-based approach to comprehensive modeling and
analysis of systems with epistemic uncertainties. *Proc. of the 10th International
Conference on Structural Safety and Reliability – ICOSSAR 2009*, Osaka, Japan,
2009.

114. T. Haag, P. Reuß, M. Hanss: An approach to the identification of uncertain sur-
rogate models for complex systems. R. Hoffmann, E. Hüllermeier (eds.): *Proc. of
the 19th Workshop Computational Intelligence*, pp. 50–60, Dortmund, Germany,
2009.

115. T. Haag, M. Hanss: Inverse fuzzy arithmetic for the identification of simplified
friction models *Proc. of the IV European Conference on Computational Mechanics –

116. T. Haag, P. Reuß, M. Hanss: An inverse fuzzy arithmetical method for the
validation, selection and optimization of models for mechanical systems. *Proc. of
the 3rd International Conference on Uncertainty in Structural Dynamics – USD

117. H. Netzmann, M. Hanss, L. Gaul: Application of selected uncertainty analysis
methods to NVH development of motorcycle engines. *Proc. of the 3rd Interna-
tional Conference on Uncertainty in Structural Dynamics – USD 2010*, Leuven,
Belgium, 2010.

118. C. Schaal, M. Hanss: Qualitätssbewertung von Modellen mittels Unsicherheits-
analysen für die wellengestützte Strukturüberwachung. *Proc. of the 37th German

119. S. Turrin, T. Haag, M. Hanss: A fuzzy arithmetical approach to the quantification
of nonlinearity. *Proc. of the 8th International Conference on Structural Dynamics –
